The gameplay is a lot more smoothed out than the first one, without many of the frustratingly tight moments of its predecessor. It's still pretty spooky, atmospheric, and is a good bit longer and larger than the first game, with plenty to explore. Personally, I felt the story of the first game was a bit more concise and powerful, but still enjoyed what this game had to tell.

If you considered the first game worth the asking price, I think the additional polish and length are worth the increase here.. Polyball was a really fun and addicting little marble game. I played a lot of the Marble Blast games when I was younger, so this game was just for me. Finding the hidden trophies in every level can be a little bit of a challenge considering there is no guide, but they're not so bad to find usually. The max amount of time it took me to find one in a level was around half an hour. You can get all the score and gold medals in earlier sectors and then be able to just relax for the rest of the game once you hit that sweet 135 medal mark for unlocking the last sector. Check astats guides for the distance grind.. Surprisingly good. Casual yet frantic, bullets flying everywhere. Unique, enjoyable, I give it 8.5 / 10, despite it's low review score. You can't go wrong for the price.. Wow, What can I say I want to see this out of interest. It looked erie from the screenshots, reminded me of Kings Field for some reason.

Unfortunately turns out this is not a game really, I'm not sure what it is. All 6 levels are an open space with one little area to search and collect and Item. Level 2 is a tower in forest. The tower is about 6x6m and 5 levels tall, 3 enemys killed in one shot lift a crystal level done. literally 10mins and your done, finished with the game.

Not all is bad. the music is very good adds a relly nice haunted undertone to the game. I also repesct the fact that the person whom made it put a lot of time in to it. It would have been hard to learn how to create and edit, something i can't do or would ever bother trying. I really did like the simple and erie look to the game, just wish there was a game here to back it up with. But for \$1.50 what do you expect.

Just not sure why this was put on steam or how it passed any level of quality control by steam. There is no game here it is just more someones muck around with Unity. Going by this I could literally create a game title sceen 10mins of anything you have semi control over and bam its a game on steam.

Finally though for \$1.50, I guess I got what I paid for. It will keep me entertained for an hour or so checking for anythign else I've missed and seeing what maxing the spells does if anything. So for a Buck Fifty yeah I'll recommend it. You can get much for that but you can get this :). JUST DONT DO IT!!!

-Shia LaBeouf

If i had played this anywhere else, I'd honestly call it a bland, empty, forgettable unity horror game. Though something about VR elevates this to a worthwhile and memorable experience. If you've got 5\$ to spare, I'd call this a good intro to VR horror.. As of 4/25/18, not worth it. I picked it up for 5 bucks, spent a few hours getting 45 floors down, and am bored. Not returning, and will absolutely try again after 3.0 release. Feels like a standard dungeon crawler, with not so subtle puzzle elements on choosing targets and equipment.. Gyromancer is a solid puzzle game that combines a simple crystal matching system with an adventure mode and selectable creatures that bring a tactical advantage to each match. The music is well done and the artwork is very good although cutscenes do not use any animations and are mostly reliant on text updates. The Steam Overlay is supported but widescreen modes are not, resulting in a letterboxed image and squished aspect ratios on the intro splash videos. While these minor issues are irritating, they are not enough to prevent me from recommending this title to anyone who enjoys puzzle games, particularly fans of Pokemon or Magic the Gathering will find the tactical system adds an extra layer of interest to an otherwise fairly standard puzzle game system. While not an essential title to anyone's collection Gyromancer a competent entry in the puzzle genre.. I have had so much fun with each section or level, you can tell they work a lot on level design, is good to find so many options to overcome a situation or an enemy, its all about choices and the way the story takes you further and further, the change of pace was a surprise during boss battles but so rewarding after you defeat them. (But when i got killed i was going crazy hahaha) A great game over all, indie studios are bringing the game up and im so glad they do.

Positives:

- +Great stealth
- +Music and visuals
- +Takedowns
- +tools to use in many ways
- +Solid AI
- +Bosses
- +abilities evolution

Negatives:

- NO trading cards

I totally recommend it .. They had a great title and they got rid of it
